Academy for training of refereeing specialists in soccer – VAR, AVAR and RO

Academy server in 1U design is used for simulation of camera signals.
The *videoReferee®-8F* server with 8 SDI inputs is used for video-refereeing.
4 graphic monitors are used for displaying – Main Interface, Referee Interface,
Multiviewer and Main Camera. The monitor displaying the Academy interface is also
used to display the main interface of the *videoReferee®-8F* server.
